“My practice is blessed with many of my own patients who return to me again and again for both surgical and nonsurgical care.”

## Q&AS

### WHAT IS YOUR #1 PIECE OF ADVICE FOR POTENTIAL PATIENTS?

“My advice to those patients seeking plastic and aesthetic surgery is to take their time and research both the surgeon and facilities. Review the training and experience, website, style of communication, educational background, before-and-after’s and community resources familiar with the physician and facilities. When it comes to cosmetic surgery, which is not covered by insurance, do not be swayed by money alone and do not travel outside the United States for aesthetic procedures. Do not be awed by a Beverly Hills address, as there are great physicians and facilities here in the South Bay.”

### WHAT DOES THE FUTURE HOLD FOR YOUR PRACTICE?

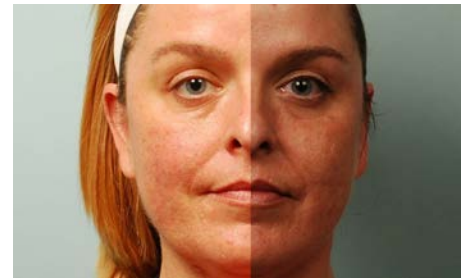

“My aesthetic practice is blessed with many of my own patients who return to me again and again for surgical and nonsurgical care. Since I was the first plastic surgeon in the South Bay to have my own on-site medical day spa, Spa Bella, and on-site certified ambulatory surgery center, I have had the privilege of taking care of my patients before and after surgery.”

### WHAT SPORTS DO YOU ENJOY?

“My husband and I love to attend the Indian Wells PNB Paribas Tennis tournament. We saw Serena Williams comeback as well as an iconic match between Serena and her sister Venus Williams. How lucky are we?”

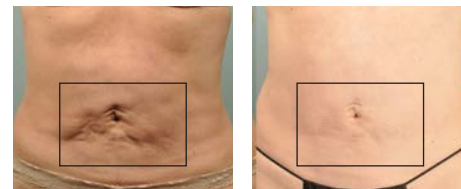

## SHARED TIP

Dr. Petti’s mantras are “You deserve to be preserved” and “Stay forever young.” There is no need to feel uncomfortable with wanting to preserve your natural and youthful appearance. Dr. Petti listens and understands the needs of her patients, as she is a believer in the benefits of excellent aesthetic treatments. She is warm yet intense, passionate and serious, but once you become her patient she is downright humorous and quite fun to be around. She makes a plan to fit each patient’s lifestyle, aspirations and budget. She has infinite capabilities to create a plan that will be unique, safe and stunning.

## RECOMMENDED

Dr. Petti has a new procedure, Vivace™ Radiofrequency Microneedling with platelet-rich plasma (PRP)—a no-downtime treatment for all skin types offered at her medical day spa, Spa Bella. The radiofrequency microneedles are robotically placed in the dermis to tighten the skin, smooth wrinkles, treat scars, active acne, acne scars and other skin surface irregularities. The micro channels created are then immersed with the patient’s own PRP serum, enhancing collagen and overall skin rejuvenation. This patient had one Vivace™ treatment for acne scarring.

## BEFORE & AFTER

This patient had liposuction years ago, leaving her with irregular pockets of fat and loose skin—most pronounced around the belly button. She received two 25-minute treatments of SculpSure™, a noninvasive, no-downtime, laser-based fat reduction office procedure that does not cause any bruising or deformation of the skin. No anesthesia is required. The patient can return to their normal activities without restrictions. I observed that patients having my SculpSure treatments post-liposuction had improvement not only in the fatty areas, but additionally the skin was smoother and tighter.
