“I have a modern practice that offers the top noninvasive, laser and surgical procedures in a beautiful, nurturing and respectful aesthetic environment.”

Q&A

TELL US ABOUT YOUR DREAMS FOR YOUR PLASTIC SURGERY PRACTICE.

“The dream of every plastic surgeon is to have a Beverly Hills address. For me, having a loving and cohesive family was also top priority. Being married to a dedicated cardiovascular surgeon and raising two intelligent daughters who attended Chadwick School required that I plant myself in the South Bay. If I could not go to Beverly Hills, then I aspired to create Beverly Hills in the South Bay. I was the first female plastic surgeon in the South Bay. I created a federally licensed ambulatory surgery center, the first office-based medical day spa and a center of excellence for cosmetic and laser surgery of the face, breast and body. I have surrounded myself with competent and caring anesthesiologists, nurses and office personnel. My team of professionals has catapulted my practice to one of the most respected and frequented in the South Bay for more than two decades. I have a modern practice that offers the top noninvasive, laser and surgical procedures in a beautiful, nurturing and respectful aesthetic environment.”

IS PLASTIC SURGERY AFFORDABLE TO EVERYONE?

“Absolutely! We take pride in designing a personal, customized beauty plan for every patient, working within their budget to achieve maximum results.”

GOOD TIMES

Good times are celebrated every March at the Indian Wells BNP Paribas Tennis Tournament, where we gather with family, friends and medical colleagues. This year was amazing with all the young, new players from the USA and around the world, starting to take down the tennis titans of Federer, Nadal, Murray and Djokovic. My husband, John Stoneburner, MD, and I treated ourselves to some Champagne, toasting the fabulous matches we observed this year.

WISE WORDS

My practice motto is “Stay Forever Young.” This mantra relates to cosmetic surgery; however, most importantly for me it relates to life. My father’s philosophy was that if you keep your mind young and your body young, you will reap the benefits of a balanced and fulfilled life. I want my patients to look as young as they feel. I aim to restore a youthful attitude and self-image. Natural results and the restoration of a carefree, confident persona are key to the goals for my patients.

MEMORABLE MOMENT

My patients and community have voted me the Best Cosmetic Surgeon in the South Bay for consecutive years. This is an honor that humbles and inspires me to be the best for every patient who is under my care. I express my deepest gratitude. I know that I have to earn this honor with each patient every day of my career. I will never take this honor for granted. I give back to the community by participating in fundraisers for the great schools and numerous charitable organizations that make our South Bay a better place to live.
