“Being voted the Best Cosmetic Surgeon is an honor that humbles and inspires me to be the best for every patient who is under my care.”

Q&AS

WHAT ARE YOUR ACCOMPLISHMENTS OUTSIDE THE OPERATING ROOM?

“Developing a licensed and certified ambulatory plastic surgery center for the past years 25 years and creating, in 1998, the first plastic surgery medical day spa in the South Bay, Spa Bella. As a woman, I love fashion, hair and makeup. I balance and cultivate this love, permitting my enthusiasm and skills to fuel my talents in my nonsurgical aesthetic practice. I have a reputation for delivering customized treatments and natural, aesthetically pleasing results when performing cosmetic injections such as Botox, facial/hand fillers, Kybella™ double chin reduction, skin peels and laser treatments.”

IS PLASTIC SURGERY AFFORDABLE TO EVERYONE?

“Absolutely! We take pride in designing a personal, customized beauty plan for every patient, working within their budget to achieve maximum results.”

WHAT IS A MEMORABLE MOMENT OF YOUR CAREER?

“My patients and the community have voted me the Best Cosmetic Surgeon and voted Spa Bella the Best Medical Day Spa in the South Bay for consecutive years. Being voted the Best Cosmetic Surgeon is an honor that humbles and inspires me to be the best for every patient who is under my care. I know that I must earn this honor with each patient every day of my career. I will never take it for granted.”

Dr. Petti with her 2017 Best of the Beach and 2017 Best of the South Bay awards

YOUR BACKGROUND

I am a board-certified plastic surgeon, in solo private practice in the South Bay since 1988. My plastic surgery training was at The University of Chicago, following a full five-year residency in general surgery. I am a former plastic surgery clinical instructor at The University of Southern

California. I have been a guest plastic surgeon for years on *The Doctors*, ABC's *20/20* and CBS's *Inside Edition*.

WISE WORDS

Two attributes that separate my practice from others are “experience” and “repetition.” The 10,000-hour rule is an accomplishment I have fulfilled. My time, technical skills, team attitude and fortitude in the operating room have contributed to my reputation as an outstanding plastic surgeon. I can be creative yet maintain the fundamental discipline required to control and execute an exceptional outcome for every patient. This has helped my practice excel, despite competition and changing times and cultural attitudes toward aesthetic plastic surgery.

BEFORE & AFTER

This patient had previous liposuction elsewhere and came to Dr. Petti for a redo. She used Smartlipo™ for contouring and SculpSure™ for skin tightening.

Laser aesthetic surgery of the face, neck, breast and body is my expertise. Smartlipo™ laser-assisted liposuction allows me to contour the face, neck and body with more precision, less bruising and more rapid recovery. I can complement laser liposuction with non-invasive, 25-minute fat reduction using SculpSure™. I am currently working with Cynosure laser corporation investigating 25-minute SculpSure™ treatments for skin tightening.
